EXPERIENCE

S. O. INFOTECH (P) LTD

MERN Stack Developer Intern

July 2025 – January 2026

Noida, Uttar Pradesh

- Developed a scalable **real-time chat application** using **MERN** and **Socket.IO**, supporting 100+ concurrent users and ensuring low-latency message delivery.
- Implemented secure **JWT authentication** and **role-based access control** to protect APIs and user data, reducing the risk of unauthorized access.
- Designed and optimized **RESTful APIs** with **Express.js**; improved query performance through efficient **MongoDB** schema design and indexing.
- Integrated centralized state management using **Redux** to improve UI consistency and reduce unnecessary re-renders.
- Adopted **MVC architecture** and modular code organization to enhance maintainability and accelerate feature delivery.

PROJECTS

Secure File Uploader | Live Demo | GitHub

Secure backend system for authenticated file uploads with cloud storage and metadata management.

- Built a **secure RESTful backend** with **Node.js** and **Express.js**, using **JWT** and **bcrypt** for authentication and password security.
- Integrated **AWS S3** for scalable file storage with fine-grained access control policies and resumable upload handling.
- Designed robust **Mongoose schemas** with validation and implemented file handling using **Multer** for reliable upload operations.

News-Hub | Live Demo | GitHub

Full-stack MERN news aggregation platform with dynamic search and optimized rendering.

- Developed a **MERN** application consuming third-party **REST APIs** to aggregate and display real-time news content.
- Implemented **dynamic search**, **category filters**, and **infinite scrolling** to improve discoverability and user engagement.
- Optimized frontend performance using efficient state management and component memoization to reduce load times.

Personal Portfolio | Live Demo | GitHub

High-performance developer portfolio showcasing projects, skills, and live deployments.

- Built a high-performance, SEO-friendly developer portfolio using **Next.js** with optimized routing and performance tuning.
- Implemented a responsive UI using **Tailwind CSS** and component-driven design for consistent UX across devices.
- Deployed via **AWS Amplify** with an automated **CI/CD** pipeline for continuous delivery.

SKILLS

Programming Languages: JavaScript (ES6+)

Frontend: React.js, Redux, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT Authentication, Middleware

Databases: MongoDB (Mongoose)

Cloud & DevOps: AWS S3, AWS Amplify, CI/CD

Tools: Git, GitHub, Postman

EDUCATION

J.S. University

Bachelor of Computer Applications (BCA)

2021 – 2024

Shikohabad, India

Dibrugarh University

Class XII (AHSEC Board)

2019 – 2021

Assam, India

V.K.V Kharsang

Class X (CBSE Board)

2019

Arunachal Pradesh, India
